About us

Sintel Italia S.p.A. was established in 1982 and has focused since the start on developing security products and solutions

for the government sector and for the broader security industry market.

In the last 25 years and more we have increasingly widened our share of the market and are now proud to number top Government and private sector players among our customers.

Our company is based in Pomezia and we also have offices in Lodi for managing our business in Northern Italy.

Sintel Italia currently employs about seventy people, 80% of which are highly qualified engineers. We also have a Research & Development area, which is responsible for the all-round development of the SW applications for all our systems.

Our international partners include all the top players on the European market, thanks to which we are able to offer cutting-edge solutions on the Italian market, while also ensuring our presence on the European market.

Mission

Sintel Italia designs, builds and sells integrated security technology and systems for the Government and Corporate markets, capable of meeting the specific needs and requirements of our customers, also as a result of flexible, original and innovatory solutions.

Our key values are:

- A culture of innovation
- Respect for institutional values
- Passion and Competence
